Technical Proficiency

Test Automation

6+ Years of experience in TEST
Automation using Selenium, TestNG,
Nightwatch, Browser
Stack, Python

Skills

Automation Framework Design

4+ years of experience
Designing/Developing Automation
Framework for Web-based
Applications, Windows Application, UI
less Automation, Back-end Automation,
API Testings.

Skills

Programming Language

Core Java, Python, TestNG, NightWatch,
ML, NLP

Database: MySQL, SQLite, Redash

Collaboration tools: Confluence, JIRA

Methodologies: Agile

Others: Performance testing using Jmeter,
Apache

Other Software/Tools

Git-hub, Jenkins, Jenkins CI/CD
Pipeline, JIRA, Jupyter Notebook

Professional Summary

Total of 6+ years experience in design and development of software test automation solutions based on software development/release requirements of web-based and client-server applications as an Automation Test Engineer and as a Manual Tester in domains advertising, and mobile application. I can develop detailed predictive analysis reports based on bug discovery and fix rate metrics and present them to upper management.

Provides quality testing using automated testing tools as well as manual testing procedures for a Product.

I can develop Automation Framework, Test Specifications, Test Plans, Test Procedures and Test Cases covering Functionality Testing, Performance Testing, Regression Testing, Conformance Testing, Stress Testing,

Integration Testing, Interchangeability Testing, Negative Testing, Acceptance Testing, Release Testing, etc.

I can build an infrastructure for a product which offers to monitor and alerting services for servers, switches, applications and services. It alerts users when things go wrong and alert them a second time when the problem has been resolved.

Work experience

4/2016

Senior Software Development Engineer in Test

[24]7.ai

My Responsibilities include Automation Testing, Manual Testing, Operation Management, Campaign Management, Ad-serving Management, Developing and writing test procedure, Requirement analysis and gathering, Reports all defects and results from testing, Defining solution approach & solution scope, Verify requirement & validate, Main Contribution in product upgrades and Product reviews. Handling analytics behavior of product using different tools. Designed an Automation framework for VCC and Advertising product. Load and Performance testing

Built a server infrastructure monitoring system using Nagios.

09/2015 -
04/2016
